

Did you know?

- You should not wear loose dentures. Have them checked immediately. Loose dentures can cause excessive friction and pressure toward the gum tissues and bones, resulting in painful sore spots and bone shrinkage.
- Dentures can warp if placed in hot water.
- Dentures can change shape if they dry out. When not in use, cover dentures with water or a denture-cleaning solution to prevent them from drying out.
- Dentures should be brushed inside and outside daily with a soft, large nylon denture toothbrush with round-ended bristles. Use denture creams instead of toothpastes, which are too abrasive and will scratch your denture. Rinse with cold water.
- Your mouth is constantly changing. Inspect your denture regularly for worn teeth. Be sure to visit your dental professional regularly as part of your recommended check up schedule.
- Some medications can affect denture fit and wearability so be sure to discuss this with your doctor and dental professional.
- Only your dental professional is qualified to diagnose your oral health and adjust your denture or partial.
- Most dental insurance policies will pay for a new denture every 5 years.
- Worn and stained dentures can make you look older and cause your dentures to function poorly.

SR Ivocap® is part of the
BPS® Premium Denture System

SR Ivocap® gives you dentures that fit!

What should you **Expect**

Not all dentures are fabricated using the same materials or technique. The acrylic used for the pink tissue portion of a denture will shrink when it is processed and can cause inaccuracies in the fit of the denture to your mouth. This shrinkage can cause sore spots and movement during eating and speaking.

Fortunately a revolutionary system, SR Ivocap®, has been developed that completely compensates for the processing shrinkage of the denture base material. The injection technology used in the SR Ivocap® system is considered the state-of-the-art in denture processing. The accuracy of this process results in a denture that will provide you with the best fit possible. You can eat, talk and smile with confidence with your SR Ivocap® denture.

SR Ivocap® advantages:

Comfort - reduced irritation to the gums

Strength - extremely dense material reduces the chance of breakage

Cleanliness - non porous surface greatly lessens odor causing plaque and bacteria

Fit - non irritating and comfortable to wear - no denture adhesive needed

Health - eat virtually any food

Esthetics - natural looking so you can smile, speak and laugh with confidence

Bio-compatible - will not distort taste, stain, or collect odors or irritating bacteria

- Premium quality dentures that instill confidence and provide confidence and provide comfort.
- Precision dentures that provide optimum function while eating, speaking or laughing.
- Natural life-like dentures that recreate the character of your smile.
